

Signalix wireless GSM/GPRS solutions

monitoring of pressure, flow, level, alarms, consumption AND control
Possibility of integration with existing systems

Remote Site

Receiving site

Monitoring & control, e.g.:

- pumps
- machines
- processes

MT-101 & MT-102:

analogue & digital I/O, modem, programmable PLC, data logger

Monitoring e.g.:

- temperature
- pressure
- tank level

MT-30X: analogue & digital I/O—several combinations, built in battery backup

Intelligent connection to remote units RS232/422/485):

PLC, measuring instr I/O, operator panels

Can replace cable connections

MT-202: GPRS—Modbus communication gateway

Battery monitoring modules (IP67 & IP68):

- water level
- silos
- sewage water tanks

MT-70X: Battery loggers with analogue & digital I/Os and power supply to external sensors
